23. Problem: (use additional Sheets if necessary)
Workload specifications used for formal performance testing must be configuration controlled. This is done by linking the workload specification to a ticket created for that purpose and baselining both in the VDB.

Note: Level 3 requirements cited in this ticket are from the list of ECS requirements in the VDB as a contract modification for the EMD F&PRS has not been issued.

24. Proposed Solution: (use additional sheets if necessary)
Add Ticket WL_70_02 to the VDB, archive the workload specification on the VDB machine, and link it to the ticket.

25. Alternate Solution: (use additional sheets if necessary)

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)

27. Justification for Emergency (If Block 15 is "Emergency"):
